

# Problem set 4

Juan Kamilo Narvaez

08 de dicimbre 2023

## Configuracion inicial

```
#Limpiar el entorno  
rm(list=ls())
```

```
## instalar/llamar pacman  
require(pacman)
```

```
## Loading required package: pacman
```

```
p_load(rio,  
        skimr,  
        janitor,  
        data.table,  
        tidyverse,  
        ggplot2,  
        dplyr)
```

```
#Verificar el directorio  
getwd()
```

```
## [1] "C:/Users/narva/OneDrive/Documentos/GitHub/pset3-202113808/code"
```

```
list.files()
```

```
## [1] "code.R" "pset3-202113808.Rmd"
```

```
knitr::opts_chunk$set(echo = TRUE)
```

## Problema 1: Bucle

### 1.1 Lista de archivos en input
